

# Empowering Marginalised Communities

[www.cns-asbl.org](http://www.cns-asbl.org)

## Our Mission

North-South Cooperation specializes in providing education and training to marginalized communities to enable their empowerment.

## Our Philosophy

We believe in participatory and people-centered development to help empower the poorest of the poor.

We are committed to making all of our interventions sustainable: our projects must develop our partners' capacity for self-supporting activities.

Please help us with a monthly donation.  
Your donation is tax deductible.

Coopération Nord-Sud

## North-South Cooperation

### Social and Economic Sustainability

We are always committed to a bottom-up approach, that puts the beneficiary communities in the centre of our interventions.

We try to ensure optimal ownership for the beneficiary communities by involving them in the decision-making processes.

We are against activities which create dependence, and we make sure that local partners and beneficiaries can continue the activities once our project is over.

### Environmental Sustainability

During our projects we promote the use of sustainable materials and environmentally-friendly energy generation.

The aim is to reduce the carbon and energy footprint of the infrastructure we build, by increasingly relying on renewable energy sources such as solar panels, or by using rainwater collection systems.
